Security Personnel

Deploy our professionally trained guards to better protect your properties and people. Our security guards have undergone stringent background checks and meticulous vetting procedures prior to employment, and have undertaken intensive training that gear them up for specific security tasks and service projects to ensure they meet customers' specific needs for guard service. Our guards' professional and presentable appearance will be consistent with your corporate image.

Manned Guarding

We supply professional manpower to serve as stationed post and patrol guards and for hotels, resorts, corporations and schools. Other services at different security level, such as security audits and investigation, and other security operations, are also offered to ensure customers' properties and well-being are well protected.

Event Security and Guarding

We offer a complete security solution for any occasions, from large-scale events to private functions. Guardforce has the personnel, experience and capabilities to facilitate the smooth operation and security of events. We provide support on event security planning, crowd and security control and escort. Our guards can be in uniform or plain-clothes to suit different occasions.

24-hour Control Room

With our 24-hour control center, we will ensure customers premises are risk-free under tight monitoring. Our emergency response team is able to react quickly to any emergency situations such as trigger of security alarm systems, disaster recovery, evacuation, and other ad hoc requests by customers.

Receptionist Service

We supply manpower to hotel, resort and airport customers to support frontline positions such as counter officer, receptionist, concierge etc to ensure excellent customer services are provided at all times. Our staff's professional and presentable appearance will be consistent with your corporate image.

Aviation and Airport Services

Operated since 1991 as Thailand's leading aviation security and airport service provider, Guardforce offers experienced and professional security and airport related services and works closely with major airlines and airports in Thailand through our Aviation Security and Service Solutions team. Specialised services are provided to the aviation industry to ensure passengers and properties are well protected and the needs of airports and airlines are well met.

Aviation Security

Our aviation security service is designed to maintain a high level of aviation security and prevent acts of unlawful disruption while minimising the hassle for passengers. Our solution covers inspection of passengers, crew members, servicing personnel, hand baggage, hold baggage, catering, cargo, mail and a thorough search of aircraft and airlines operating area. We apply a combination of operational expertise and pioneering technological solutions in the areas of aviation security and immigration, training and assessment, and general security management intended for detection of weapons, explosives, other dangerous devices and prohibited items which can be used for acts of unlawful disruption as well as for prevention of illegal immigrants.

Passenger Security / Immigration Fines Prevention

As airlines are required by many countries to check passengers' travel documents, and face fines and penalties for carrying inadequately-documented passengers, airlines are exposed to costly burdens in passenger checks. Our services ensure passenger checks are compliant with immigration or border control rules and regulations. Such services include verification of the authenticity of a passenger's travel document, passenger / passport / boarding pass reconciliation, and other requirements specific to a passenger's travel destination.

Left Luggage

Guardforce is experienced in working with international airports to provide luggage safekeeping services. Our professional teams, access-controlled storage facilities and strict operational procedures ensure the highest convenience in securing, storing and returning luggage.

Airport Services

We provide manpower to airports and airlines to fulfill their needs to enhance passenger's experience. Our services include airline lounge management, airport concierge services, cleaning services, trolley management, wheelchair service, and more.

Innovative Solutions

Integrating our cutting-edge intelligent technology expertise with our diverse security services, we offer our customers innovative solutions to cope with the constantly changing business environment and evolving technology, not only ensuring security is enhanced but most importantly creating long-term benefits for our customers.

Guardforce Cash Deposit Machine

Our fully-automated cash deposit machine provides end-to-end solution for retailers, alleviates staff workload and minimizes their exposure and risks, so there will be no more manual counting and verifying. It can count 600 notes in a minute and recognise multiple currencies with intuitive counterfeit note detection. It eliminates manual counting discrepancies and provides real-time management and monitoring via PCs or smart devices. Its built-in safe function helps prevent theft, ensuring save overnight storage if needed. The cash deposit machines are available for rental to be used in individual stores or shopping malls.

Retail Analytic Solutions

Retail stores equipped with CCTV systems can make use of store cameras to glean useful data that help them make optimal management decisions and marketing strategies to boost revenues and reduce costs. Guardforce's retail analytic solution can turn video images captured by CCTVs into useful data for analysing customers' behavior and provides visual insights to user. The technology has the features to perform analysis on visitors, products and stores, helping the users on staff management and multiple-store comparison, and reports and insights can be accessed via any mobile devices anytime, anywhere.

Cyber Security

Other than protection of physical properties, we also offer our customers solutions to protect virtual and intangible assets and data. With the booming of e-commerce and digital business transaction increasingly reliant on computer systems, mobile devices, the internet of things and wifi access, businesses face another level of threats and risks associated with cyber safety.

Guardforce offers total solutions in this area, from threat prevention to detection and response, to protect customers from data loss, hackers or any types of attack to computer systems and networks.

More tailor-made solutions are available to cater to the specific needs and requirements of your business. Please contact us for consultation and learn about our future development.
